

# Public Mining Claims Claim Name/Number Index Report

**Menu Option:** Pub MC Claim Name/Number Index

**Purpose:** This index is used to find claim information by claim name and/or number. The report includes the geographic state (geo state), claim name/number, serial number, lead serial number, claimant(s), and geographic information, i.e., meridian, township, range, section, and subdivision, and county. It also includes the location date, and case closed date if applicable. There are two views for this report: By Claim Name and By County.

**Selection Criteria:** The criteria input for the report is found in Lands & Mineral System Report, under the Public Mining Claims Reports section. There is a combination of mandatory and optional criteria.

The mandatory criterion include administrative state, claim name or number, and case disposition.

Optional criterion are geographic state, county, district office, field office or administrative agency.

**Note:** To retrieve a listing by claim name for all claims in a particular county, district office or field office, select the appropriate admin state from the list. Then click on the down arrow next to county and a drop down list will display all of the counties within the admin state. You may select one or multiples by clicking into the small box before the county name.

Choose your selection criterion carefully. Asking for too much information (e.g., all claims in your state) can tie up the LR2000 system, your own computer, and the printer for a long period of time.

## Procedure:

1. Select **Pub MC Claim Name/Number Index** from the reporting menu.

Please notice that the required criterion is indicated with an asterisk.
